

# CWW's FAVORITE EMPOWERMENT TIPS!

Know the difference between the jobs you learned the most from and those you gained the least from.

Defend your career by building a better package of yourself.

In moments of career crisis, don't react with panic. Instead, look for solutions by sifting through the debris.

## Rule Your Career... Don't Let it Rule You!

Don't get locked into one job, one industry or one company.

Figure out how to shift your technical know-how into practical do-now.

Stay ahead of your game by creating "what-if" scenarios so that you can prepare for the "what-next" situations.

Know that not every work experience will provide you with an opportunity to increase your skills and knowledge. Sometimes a job is just a job – not a career.
